

ACME DESIGN, INC. OPENED FOR BUSINESS IN AUGUST OF 1992, serving up custom orders from Clint Borucki's garage. More than 20 years later, Acme Design has become the shop that quality built, with an experienced staff of trained artisans who whip up magic to make customers' dreams come true, all from their cozy shop in Elgin, Illinois.

Blending traditional methods with the latest technology, the crew at Acme Design has a buffet of fabrication skills, serving discriminating patrons the finest array of models, exhibit displays, props and prototypes, all made fresh to order.

From a raw, new sprout of an idea to a beefed-out plan that's well-aged and seasoned, Acme Design listens carefully, cares deeply and works closely to serve up exactly what you, Our Customer, order.

“MAKE BIG THINGS SMALL”

“MAKE SMALL THINGS BIG”

IF YOUR FAVORITE ISN'T LISTED...

Ask for it!

Heartier Hankerings

Trade Show Displays

Oversized product, replicas, statues, walls, facades and environments. Just like mom used to make!

Big Plates and Small Sides

Big, for when real is too small, and small when real is too big. Or...giant thimbles to miniature earth movers.

Specialties of the House

Sculpting

Fine hand work to the latest in digital sculpting. Made to taste.

Rapid Prototyping

3D printing, CNC machining, resin casting from your 3D data, and all to your recipe! Our in-house Objet printer works with an array of materials in wafer thin slices, making detailed parts for discriminating palates.

Silicone Molds

Experienced mold makers can handle a fine art master sculpture or cook up fast and efficient means to make production. In short order.

Resin Castings

Detailed reproductions of clay master sculpts or carefully engineered test parts, our master casters work with large and small orders: hobby kits, limited edition collectible production and trade show or museum display components. What'll ya have?

Rotational Castings

Items up to a five foot sphere reduce the shipping weight and cost. (Hey, we all need to lose a few!)

May We Suggest...

Vacuufforming

Hot off our broiler, from blister packs to lightweight display pieces. Try the clamshells!

3D Scanning

Big or small portions, master parts scanned for reproduction, resizing or reverse engineering. In-house FTP services are available for confidential file transfer.

CNC Machining

Prototype a new part, make a master for reproduction or create a detailed sculpture.

Deluxe

Hardcoating

Order it spicy! Fire retardant hard coating with virtually no size limitations is impact resistant, rated for indoor/outdoor use and durable enough to hold up against the most pernicious public pawing.

Props

Product “heroes”—better than the real thing. Imagery from the cyber-realm magically manifested to hold-in-your hand reality. Your custom dish will look good enough to eat!

For Smaller Appetites

Miniatures and Architectural Model Making

Detailed hand fabricated lay-outs to rapid 3D printing from .STL files.
